

DDL S House Rules: Custom Guns

Please note – Before you build a custom gun, read the following house rules.

If you have any questions, email Spooky.

Rules for all guns:

BFS SATR system only. No alternate brands permitted.

All guns must use a BFS key switch so that referees can program the gun.

Illuminated scopes/sights must be hard wired into the gun power system so that simulated recoil does occur.

All guns must have working head sensors and a working gun sensor.

All guns must be as loud or louder when compared to a factory BFS gun of the same class.

All guns must be the same weight or be heavier when compared to a factory BFS gun of the same class.

All guns must be at least the same length or longer when compared to a factory BFS gun of the same class.
